

JANOME

Accessory of the Month

July 2024

Embroidery ANTI-GLUE Needle

This anti-glue needle has a special coating that withstands the gummy build-up you can experience when stitching fabrics fixed with basting sprays, sticky stabilizers, iron-on interfacings, sticky Velcro, etc. Also good for stitching light to medium weight rubber-back fabrics. This needle has a light ball point, great for multi-directional stitching, such as hooped embroidery, applique, decorative stitching or plain zigzag. If you are always cleaning your needle from a sticky build-up then try this anti-glue needle that is made for the job, with its special coating. Though not branded Janome, organ needles are the default needle used in all Janome sewing and embroidery machines.

The Accessory of the Month is used in our 'Block of the Month 2024'. [Download link < Block 11 and Block 12 >](#)

"BOM 2024" is about learning to use various stitches, accessories and techniques. At the end of the year all blocks are pieced together, quilted and bound into a completed quilt project.

Did you know Janome have a Bobbin Holder Cleaner [Part number 859858007]

Used to clean the bobbin area and bobbin holder after sewing with adhesives such as basting sprays, iron-on stabilizer, sticky stabilizer, etc. Cleaning the bobbin area & bobbin holder after using these products can prevent the bobbin holder from jamming as any residual glue will heat up with friction and you can experience stitching issues plus a sticky bobbin holder.....take 5 minutes to clean, give it some TLC.
